

Main Entrance

Each cottage has one step down to floor level once inside the front door. The distance from door to the step is Cheese House 104cm, Cyder House 122cm. The step depths are Cheese 18cm and Cyder 20 cm.

Both houses are open plan downstairs. In the Cyder House the old Cyder Press is used as a room divider and in the Cheese House the kitchen is under an arched beam.

Both cottages have wooden floors with rugs throughout.

I now describe each cottage individually.

The Cyder House has a magnificent “stepped fireplace” with woodburning stove. This is laid ready for guests to light. Logs are provided.

Door leads into hall where there is an emergency exit door leading into the courtyard (rear of farmhouse).

First flight of stairs (12 steps, 75cm wide) with banister on right. On this landing a Shower room (cubicle 71cm x 66cm), toilet and washbasin with heated towel rail. Two single bedrooms.

Second flight of stairs (12 steps, 75cm wide) again banister to the right.

Small landing with skylight window, ottoman, luggage rack, and full length mirror. Door into gable ended double room with skylight window. Restricted height 156cm (cushioned beam), side of bed 180cm (floor to ceiling).

The Cheese House. I have already explained the open plan design downstairs a little. There is an emergency exit door leading in to the courtyard at the rear of farmhouse. Visible in one corner of the lounge area, near the television, is the first flight of stairs which are boxed in. The first two steps are on a slight curve with no rail. The staircase is 73cm wide, 10 stairs, 20cm high hand rail on the left.

First landing has a single bedroom with a view of the courtyard and paddocks, double room has ample room for cot (which can be provided), two windows both with low cills (46cm). For child protection chains are fitted to the window catches.

The shower room has a shower cubicle 76cm x 110cm, washbasin, toilet, heated towel rail and window with frosted glass. Past the shower room door one step (20cm), turn to the left second flight of stairs (12 steps, 73cm wide) with handrail on the left arriving at The Gallery (beam 167cm). Seating area with two armchairs, portable television and skylight window.

Door into twin bedded room with low window cill 23cm, child protection chains on window catches.
